

PROFESSIONAL SUMMARY

Software Engineer with 5 years of Full Stack and DevOps experience designing and automating CI/CD pipelines, cloud infrastructure, and application deployments. Skilled in **AWS**, **Docker**, **Kubernetes**, **Terraform**, **Ansible** and **Python** automation. Currently expanding expertise in modern cloud-native stacks including **FastAPI** microservices and infrastructure-as-code best practices. Open to immediate relocation to India

WORK EXPERIENCE

Bosch Global Software

SEP 2019 – OCT 2022

Software Engineer

(India)

- Developed **FastAPI** RESTful APIs with **Pydantic** for robust data validation and schema management, integrated with **DBSchema** for efficient database design and modeling, enabling secure microservices communication and API gateway functionality, and enhancing API performance by 15% in full-stack environments.
- Integrated **Apache Kafka** to enable event-driven communication and real-time log streaming across distributed services, improving observability and decoupling microservice dependencies.
- Integrated **Python**-based code analyser with **GitLab** version control and **Splunk** data visualisation, reducing **Jira** redundancy and improving debugging efficiency by 10% through automation.
- Managed efficient containerisation using **Docker** within **Amazon EKS** clusters, achieving a 30% reduction in deployment times and ensuring seamless application scalability in production environments.
- Migrated core business applications from on-premises infrastructure to **AWS** using **EC2**, **S3**, **RDS**, and **Route 53**, achieving a 25% reduction in infrastructure costs and improving scalability, reliability, and disaster recovery readiness.
- Implemented **C++** logging library for Infotainment Systems generating customised logs for **debugging**.
- Developed and managed Infrastructure as Code (**IaC**) configurations using **Terraform** and **Ansible**, reducing deployment errors by 40% and streamlining consistent, scalable deployments on **AWS** environments.
- Automated key deployment processes using **Python**, reducing operational toil by 35% , optimising **AWS** workflows.
- Designed and developed dashboard to **monitor** source code data using **Grafana** and **Prometheus** with **Python** backend and **SQL** database.
- Integrated security testing tools such as **SonarQube** for static application security testing (**SAST**), **OWASP** for dynamic application security testing (**DAST**), and **Trivy** for container vulnerability scanning, ensuring compliance with security best practices and maintaining high code quality.
- Created and maintained **Ansible** playbooks and **Terraform** modules to automate infrastructure provisioning across development, testing, and production environments, ensuring consistency and reliability.
- Mentored and coached junior engineers on **DevOps** practices, **containerisation**, **AWS** and **IaC**, improving team productivity and accelerating onboarding by 25%.

WHEELSBOX

FEB 2019 – MAY 2019

Web Developer Intern

- Developed **React/Redux** frontend for a vehicle service application with **AWS (Lambda, API Gateway)** backend, **Selenium** automated testing and containerised using **Docker** and deployed via **Kubernetes**.
- Built a **React-based** web service application managing customer requests using **AWS** backend, streamlined operations with Jenkins CI/CD pipelines and **Ansible** automation, enhancing service delivery by 20%.
- Executed UI testing with **React Testing Library** and **Jest**, integrated into **Jenkins** CI pipelines with Dockerised test environments, ensuring consistent UI behaviour with over 95% component test coverage.
- Designed **wireframes** and interactive prototypes in **Figma** to guide frontend development, improving design consistency and user experience.

Flutter Mobile App for File Conversion to QR/Barcodes

- Developed a **Flutter**-based mobile application converting files to QR codes and back for efficient data sharing, achieving a 95%file conversion success rate.
- Utilised binary data conversion and QR code generation libraries to implement the core functionality, enabling seamless user interaction and accurate file retrieval.

FastAPI Automation Suite

- Developed a **FastAPI**-based microservice suite for API automation and testing.
- Integrated CI/CD with **GitLab** for automated **Pytest** and **Playwright**-based validation.
- Designed modular test architecture and implemented containerised builds using Docker.

Cloud-Native Monitoring Dashboard

- Prototyped a self-hosted observability stack to monitor containerised applications using **Python**.
- Configured **Prometheus** metrics collection, **Grafana** visualisations, and alerting workflows.
- Embedded **DuckDB** as a local analytics store for deep-dive observability, complementing real-time **Prometheus** and **Grafana** metrics.

Sainsbury’s

OCT 2023 - PRESENT

Assistant Manager

- Led day-to-day operations in a high-availability environment, coordinating every staff member to meet strict service and delivery targets
- Acted as first point of escalation during operational incidents, **triaging issues, coordinating response**, and restoring normal operations under time pressure
- Implemented and enforced **standard operating procedures (SOPs)** to ensure consistency, safety, and compliance across shifts
- Monitored operational **KPIs** (staffing efficiency, service availability, turnaround times) and adjusted execution plans to reduce bottlenecks
- Onboarded and trained new team members, reducing ramp-up time and improving handover quality
- Communicated real-time status updates to senior management during peak operations and incident scenarios

TECHNICAL SKILLS

- **Cloud Platforms:** AWS services, EC2, S3, RDS, Lambda, EKS, and IAM,Google Cloud Platform
 - **Containerisation & Orchestration:** Docker containerisation and Kubernetes orchestration, Amazon EKS.
 - **Infrastructure as Code (IaC):** Terraform and Ansible
 - **CI/CD & Automation Tools:** Continuous Integration and Continuous Deployment methodologies using Jenkins and GitLab CI/CD,
- **Database and Querying:** PostgreSQL, MySQL, GraphQL, Postman, REST API
 - **Scripting & Programming:** Python, Bash, Java, Javascript/Typescript, Linux shell
 - **Monitoring,Logging:** Splunk,Aws CloudWatch, Kafka
 - **Security & Compliance:** AWS IAM, and security groups, (SAST)sonarqube, Trivy, (DAST) OWASP .
 - **Frameworks:** Django, FastApi, Flask, Pandas, Pydantic, Matplotlib

EDUCATION
